Provider Profile

Information provided by the provider describing their agency:

Connecting Children and Families is professional foster care program for young children and adults who are at risk of being removed from regular family and community life. These individuals have typically failed in traditional foster care and are at risk of being placed in psychiatric or residential institutions. These children and young adults display high rates of inappropriate behaviors. They are aggressive, destructive, and self-injurious. The focus of the program is on finding and supervising families to provide therapeutic homes for the children and/or adults. On-going clinical support is provided to the families by the program's clinical staff. The treatment approach is rooted in behavior analysis and social role valorization. The philosophy of this program is that all individuals should live in families and participate in community activities. Any individual with significant special needs will experience the most success when treatment occurs within a family and within a community setting.
